FRONT END DEVELOPER

As an experienced Web Developer, I am dedicated to crafting visually appealing and interactive websites that not only meet but surpass customer expectations. Proficient in developing custom plugins, I excel in a range of technologies including HTML, CSS, JavaScript, Python, SQL, as well as specialized frameworks like React.js and Vue.js.

STRENGTHS & EXPERTISE

HTML	Tailwind	React JS
CSS	CI/CD Pipeline	Auth0 & MSAL
JavaScript & TypeScript	Azure DevOps	Python
Bootstrap	Vue JS	Node JS
	SQL	Express JS

WORK HISTORY

Ariqt International

Front End Developer

April 2023 – Present

RESPONSIBILITIES

- Responsible for developing and maintaining web applications using Vue.js with TypeScript & Tailwind. Designed and implemented Azure DevOps CI/CD Pipeline for continuous integration and deployment.
- Troubleshoot and debugged web applications to ensure optimal performance and user experience.
- Working in an Agile/Scrum setting, including partnering with business analysts, other developers, and testers, and implementing solutions related to the creative process.
- Integrated web applications with MSAL for authentication and authorization, and HTTP/REST-based APIs.
- Collaborated with cross-functional teams, including designers, developers, and project managers, to develop and test web applications.
- Had to stay up to date with emerging trends and technologies in web development and make recommendations for improvements.
- Design, build, and maintain high-performance, reusable, reliable, and testable Vue.js/HTML/CSS code that connects with APIs.

PROJECTS

1. COWMANAGER

- Migrating Vue 2 to Vue 3.
- Building reusable UI components in Storybook using Vue 3.
- Developing new features using Vue 3 Composition API, and E-Charts.
- Implementation of i18n internationalization.

2. BILL-BUDDY

- Auth0 implementation in authentication.
- Developed UI using Vue 3 and Bootstrap.
- REST API Integration.
- Deployed using Azure CI/CD.
- Implemented i18n internationalization.

3. PING PONG TOURNAMENT

- Implemented the user interface for tabs such as Groups, Schedules, and Admin Portal, ensuring a cohesive and user-friendly navigation experience.
- Developed pagination functionality for the Admin Portal, enhancing the ease of managing and navigating through tournament data.
- Utilized HTML, Tailwind CSS, JavaScript, and Vue JS to bring the envisioned user interface to life, focusing on interactivity and responsiveness.
- Rest API Integration.
- Implemented i18n internationalization.
- Successfully deployed the Ping Pong Tournament App on Azure, making it accessible through the provided project link - [Ping Pong App](#).

CERTIFICATIONS

- HTML, CSS & Bootstrap
- JavaScript
- Python
- SQL
- Node JS
- Express JS

EDUCATION

- **AV COLLEGE OF ARTS, SCIENCE & COMMERCE**
 - Bachelor of Science MECs | 2017-2020 | CGPA: 79.95
- **SUGUNA JUNIOR COLLEGE**
 - Intermediate| 2015 - 2017 | CGPA: 89.2
- **SAIDAIAH CONCEPT SCHOOL**
 - SSC | 2014-2015 | CGPA: 8.7
